

Key Performance Indicators Set

Access to vehicle sharing solutions

The number of available vehicles for sharing to enhance the multi modal options, to improve the sustainability of the fleet (new vehicles, e-vehicles, bikes...) and to decrease the number of private vehicles owners.

- MAIN REFERENCE: CityKeys, STEEP/REPLICATE, (EEA sharing users)
- DATA SOURCE: municipal transport department
- MEASUREMENT METHOD: number of sharing vehicles versus 100.000 inhabitants [n/100.000 inh]
- PRIORITY: OPTIONAL
- Usefulness and user-friendliness: it can be useful in addition to public transport KPI to evaluate the sustainable mobility offer. It could be related to UN SDG 9 infrastructures.
