

Key Performance Indicators Set

Climate resilience strategy, adaptation & risk reduction analysis

This indicator will measure the extent to which the city has developed and implemented a climate resilient strategy.

- MAIN REFERENCE: CityKeys, RFSC, UN SDG KPIs 1.5.4-11.b.2-13.1.3 about risk strategies with differences in the descriptions and the units
- DATA SOURCE: Municipality, adaptation tool
- MEASUREMENT METHOD: The indicator provides a qualitative measure and is rated on a seven-point Likert scale.

This **Likert scale** is based on the steps suggested by the “Mayors adapt” initiative for climate change adaptation in urban areas.

1. No action has been taken yet
2. The ground for adaptation has been prepared (the basis for a successful adaptation process)
3. Risks and vulnerabilities have been assessed
4. Adaptation options have been identified
5. Adaptation options have been selected
6. Adaptation options are being implemented
7. Monitoring and evaluation is being carried out.

- PRIORITY: OPTIONAL
- Usefulness and user-friendliness: It contributes to UN SDG 1 – End of poverty, 11 – Sustainable cities and communities, 13 – Climate Action where KPIs related to local disaster risk reduction strategies are foreseen
